

Exact Path ~ GCS Summer Bridge Program

Keep Learning Going All Summer Long

Get to know Edmentum Exact Path!

Studies show that when children are not engaged in learning activities over the summer months, they lose up to two months of math and reading skills. Don't send your kids back to school already behind—keep them engaged in fun learning experiences that set them up for success in the new school year.

This summer, we are using an online learning program called Edmentum **Exact Path**. This exciting tool personalizes learning across **K–12 in reading, language arts, and math**. It starts by targeting each child's academic strengths and weaknesses with an adaptive assessment, and then it prescribes a tailored playlist of lessons, practice, and short quizzes at their learning level.

Where can my child find their work?

Your child will primarily spend time in the learning path. Here, students receive one skill to work on at a time, which can consist of a lesson, practice, and Progress Check. Outside of the learning path, a child might also receive additional assignments from a teacher with specified due dates.

How will the learning path change as my child keeps working?

The short Progress Checks that assess learning at the end of each skill module also adapt the learning path going forward. If your child earns 80% or above, they have mastered the skill and can start a new skill. If they earn <80% they will get another chance to complete the lesson module before receiving a prerequisite skill known as a Building Block for additional remediation. Your child's teacher will be notified along the way to keep up with learning progress and provide targeted support.

Where can my child see their progress?

Look in the Rewards area to track progress and skill mastery. Your child must earn 80% or above on a Progress Check in order to earn a Trophy for that skill. Teachers can also create personalized challenges to motivate learning. These allow the educator to set goals around how many skills your child should aim to master or how much time they should spend learning in the program.

How often should my child use Exact Path this summer?

Children who spend **40–60 minutes per week** in each subject area are proven to make the greatest academic growth. Using this time recommendation, shoot for working in the program in at least **two 20-minute sessions** each week and watch learning accelerate!
